## Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Level 1	Level 1	Level 1

### **Oroville Dam Auxiliary Spillway Incident**

On 04/29/17 at 1344 hours the Department of Water Resources (DWR) advised the California State Warning Center (CSWC) that they were decreasing the flow to manage Lake Oroville's water surface elevation and to safely close the Flood Control Spillway.

- The Hyatt Powerplant outflow has increased from 0 cfs to 8,000 cfs.
- The Oroville Dam Flood Control Spillway flow will eventually be curtailed from 35,000 cfs to 0 cfs.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) [as of 05/05/17 at 0600 hours](#):

- Inflow: [26,159](#) cfs.
- Outflow: [7,976](#) cfs.
- The current lake elevation is [840.89](#) feet.

### **Mission Tasking**

- 2017-SOC-33363: Road Repair (Butte County) – On Scene.
- 2017-SOC-34379: Caltrans engineer to visually inspect and conduct Impact-Echo Testing on the gated concrete spillway floor – On Scene.
- 2017-CalOES-34685: Asbestos Monitor (Butte County) – On Scene.

# **SITUATION SUMMARY**

## **Cal OES COASTAL REGION**

### **Bay Area Rapid Transit (BART) track closures**

BART plans to close the tracks between Fruitvale and Lake Merritt Stations to perform vital repairs on select weekends through July. The next closure is planned to occur this weekend: 05/06/17-05/07/17.

- During the closures there will be no train service between Fruitvale and Lake Merritt and the Lake Merritt Station will be closed.
- A free bus bridge will operate between Fruitvale and 19th St. Stations in Oakland to shuttle riders around the closure.
- Riders on the Fremont, Dublin and Oakland Airport lines will be impacted adding 20 to 40 minutes to travel times.

# **SITUATION SUMMARY**

## **2017 February Storms**

### **Cal OES Coastal Region**

#### **Pfeiffer Bridge Incident, Monterey County**

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

Per the Cal OES Coastal Duty Officer (CDO), as of 04/27/17, Hwy 1 from the south is closed at Ragged Point and is open at specific intervals to local traffic only. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

### **Cal OES Inland Region**

#### **River Forecast - The following rivers are forecast to meet or exceed Flood stage:**

##### **Placer County:**

- Truckee River at Truckee is forecast to be above flood stage at 4.9 feet the morning of 05/07/17.
  - Potential Impacts: Flood Stage. Minor flooding from Bear Creek in the Alpine Meadows area to Truckee. Truckee River bike path between the River Ranch at Alpine Meadows Road to Tahoe City begins to flood. Basements and yards of some low-lying homes along the river begin to flood. Deep Creek Campground begins to flood. About 2270 cfs. USGS estimates this much flow has about a 1 in 4 chance of being exceeded any year.

##### **Mariposa County:**

- Merced River at Yosemite at Pohono Bridge is forecast to be at or above flood stage at **11.5 feet and is receding**.
  - Potential Impacts: Water tops the swinging bridge downstream from Chapel Meadow. Overflow from Woski Pond floods access road (Northside Drive) leading out of the west entrance of the park.

#### **River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:**

- Alpine County: West Fork Carson River at Woodfords, East Fork Carson River at Markleeville
- San Joaquin County: San Joaquin River at Vernalis
- Stanislaus County: Tuolumne River at Modesto
- Merced County: Merced River at Stevenson

# **WEATHER SYNOPSIS BY REGION**

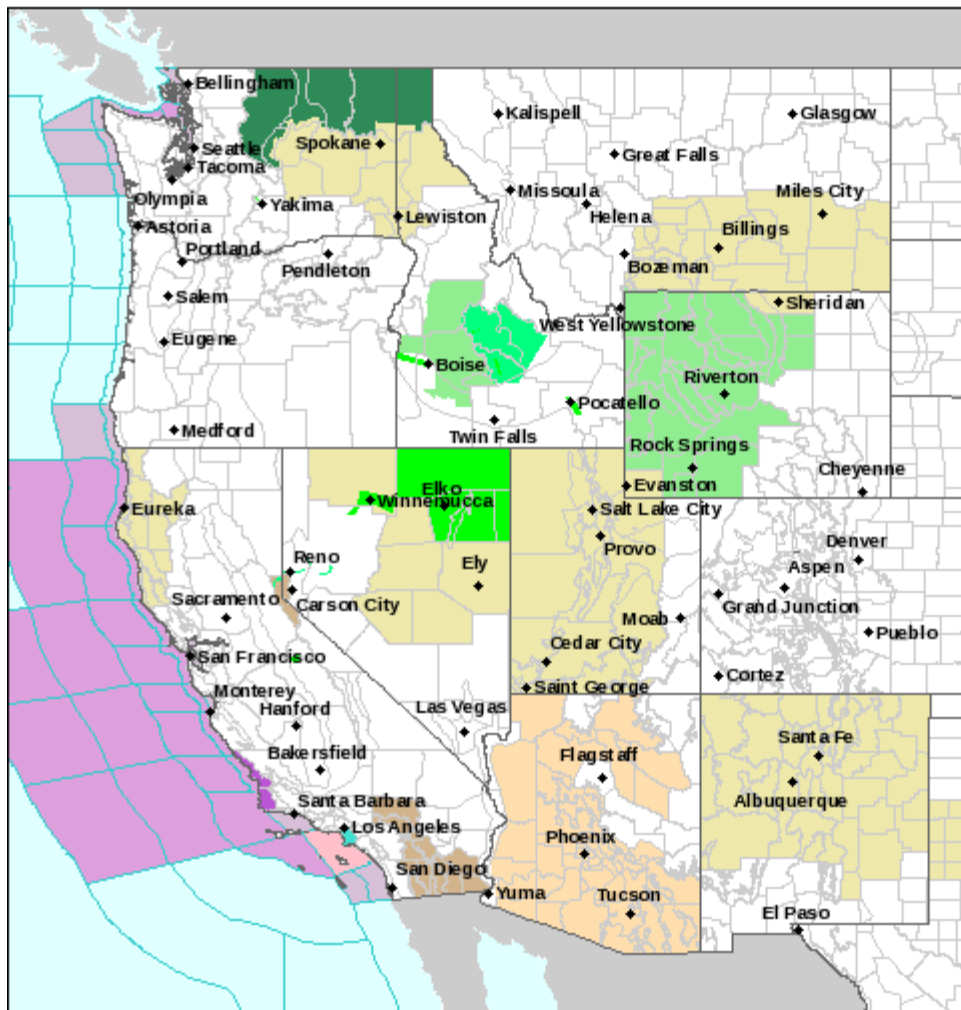

## **NORTHERN CALIFORNIA**

A low pressure trough is approaching the coast. That trough arrived just off shore last night and will eventually move inland tomorrow. A closed/cut off low will form over the Bay Area tomorrow afternoon that will drift south Sunday and eventually move east into Arizona Monday. A migratory high pressure ridge will be over the region behind that low Monday but already moving SE out of the region Tuesday. Another low pressure trough is anticipated to arrive Tuesday night and will linger over the region Wednesday onward next week. Through Saturday there will be a chance of daily light showers and isolated afternoon and evening thunderstorms in our northern and eastern mountains in particular. Coastal and valley areas will have less chance of such events. The best chance of light showers and mountain thunderstorms will shift south and east Sunday and probably only be near Tahoe to the south Monday. Otherwise, next Monday and Tuesday appear most likely to be dry, but Tuesday night the mentioned low pressure trough is expected to bring precipitation to the NW areas, and this will probably spread inland across the whole region during the day next Wednesday. Today will begin a marked cooling trend. The valley areas will be in the mid and upper 70s today. Tomorrow should be the coolest day of the next 7 with the warmest inland areas right around 70, which is notably below normal. The peak warmth next week will likely be Tuesday with the warmest inland areas within a few degrees of 80. Moderately strong, gusty southerly winds that developed yesterday in the central and NE areas of the region and Delta area are expected to exist today. Tomorrow moderately strong, gusty north winds will develop that will last through Sunday night before decreasing Monday. Those north winds are also expected in all areas, not just the Sacramento Valley and surrounding foothill areas that are commonly favored by such events.

## **SOUTHERN CALIFORNIA**

A trough will drop down the West Coast bringing the start of significant cooling trend to the region today and minimum humidity will increase to 20% to 40%. This trough will separate from the main flow and a deep area of low pressure will form across the region tomorrow. This low will stay in the vicinity through early next week bringing scattered showers and thunderstorms. Most Locations across the region and the Sierra will receive between a half inch and two inches of rainfall with this low pressure area tomorrow afternoon through Tuesday afternoon. Most locations west of the Sierra across Central California will receive less than a half inch of rainfall. The snow level will be between 5,000 and 6,000 feet. South to west winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas this afternoon through this weekend. Temperatures will become 10 to 20 degrees below normal this weekend into early next week. A weak ridge of high pressure will build into California from the Pacific Ocean bringing warmer and drier conditions to the area starting Wednesday.
